Min Kaung Myat

JUNIOR REACT DEVELOPER, JUNIOR FRONT-END DEVELOPER

An IT enthusiast with a comprehensive skill set spanning web development, system analysis, design, and database management. Aspiring to carve a path in front-end development, I'm currently immersed in mastering React, through self-learning and online courses, with a parallel fascination for UI/UX design. Despite my lack of formal work experience, my dedication and knack for rapid self-learning set me apart. I am confident in my ability to seamlessly apply theoretical knowledge to practical scenarios.
